13. Controller’s Office
   b. City of Lansing Request for Assessing Assistance
Mr. Dolehanty reviewed the City of Lansing’s proposal for assessing assistance and the meeting with the State Tax Commission. His suggestion was, in the short term, to have Doug Stover, Equalization Director, not sign anything but to not completely dismiss the idea of helping the City of Lansing. His suggestion for the long term was to look at other counties to see if they could provide a model for how to handle these requests in the future.

Commissioner Koenig asked what the upcoming dates for the signing were.

Mr. Dolehanty answered that the first date was the first Monday in March.

Commissioner Koenig stated that, instead of doing a reassessment, putting together a plan to help them in the future might be more beneficial.

Mr. Dolehanty stated that he was going to try to move the City of Lansing in that direction.

Commissioner Bahar-Cook stated that it might be worth looking into if any municipalities were interested in being included in the long term plan.

Mr. Dolehanty stated that he would bring it up during his next meeting.

RE: Parks Line Item Transfer Request

As part of the 2016 capital budget request, the Parks requested a trail blower for Hawk Island. Due to budget constraints, funding for the item was not included in the 2016 budget. The Board of Commissioners’ budget policy requires that transfers between cost categories of more than $5,000 but less than $25,000 be approved by the appropriate liaison committee and the Finance Committee. The Budget Office has confirmed that the funding is available.

Your approval of the requested transfer is recommended. Please feel free to contact me if you have any questions or would like any additional information.

Subject: Bennett Village Condominiums Final Acceptance

Background: Much of the process by which a condominium development is developed follows state statute. The process essentially starts with creation of a Preliminary Plan of the development that shows the overall configuration, how it fits into the lands that surround it, public utilities serving the lots, and the phases of construction planned to complete its development. Once a Preliminary Plan is approved by the stakeholders (township, road agency, drain commissioner’s office, etc.), construction plans can be developed, which also must be approved by the stakeholders. Once the construction plans are approved, construction can begin. After construction is completed, an acceptance process is normally initiated to make the roads, drains, and utilities serving the development public.

The Bennett Village Condominium development is a 41 unit single-family development located on 25.57 acres, north of Bennett Road and east of Hulett Road. The development is part of the Southwest ¼ of the Southwest ¼ of Section 28, Meridian Township, Ingham County, Michigan. The development has followed the process described above for the first of its two phases. Phase 2 of Bennett Village Condominiums, which includes a proposed public roadway named Turning Leaf Lane, has been constructed to the point where the proprietor (Giguere Homes) is asking for Ingham County acceptance of its proposed public roadway.

All Road Department fees and submittal requirements have been received and the township and drain commissioner’s office has accepted or given “approval to use” their public facilities serving the development.

The reason for this memo is to recommend acceptance of Turning Leaf Lane into the Ingham County public road system so that the Charter Township of Meridian will permit housing construction and to enter into a Bituminous Paving Agreement for completion of road paving, pursuant to Section V(U)(4) of the Road Department’s Procedures and Guidelines for Developing Public Roads policy.

Section V(U)(4) allows developers the ability to complete all but the final course of asphalt on proposed public roads, provide assurance in the form of an agreement and bond for the final course of asphalt, and complete the paving once most of the development has been built. The result of delaying the final asphalt paving is better developer cash flow opportunities, time for defects to surface and be repaired, and ultimately longer road service lives.

Approval of the attached resolution is recommended.
INTRODUCED BY THE COUNTY SERVICES COMMITTEE OF THE:

INGHAM COUNTY BOARD OF COMMISSIONERS

RESOLUTION TO ACCEPT TURNING LEAF LANE INTO THE
INGHAM COUNTY PUBLIC ROAD SYSTEM AND APPROVAL OF A BITUMINOUS

WHEREAS, pursuant to Resolution No. 14-172, the County approved the Preliminary Plan for the residential development on April 29, 2014; and

WHEREAS, Phase 2 of Bennett Village Condominiums, which includes a proposed public roadway named Turning Leaf Lane, has been constructed to the point where the proprietor (Giguere Homes) is asking for Ingham County acceptance of its proposed public roadway; and

WHEREAS, all Road Department fees and submittal requirements have been received; and

WHEREAS, the township and Drain Commissioner’s Office has accepted or given “approval to use” their public facilities serving the development.

Commissioners,

Hope all is well. Please take a moment to read the commentary below. I attended the engagement session last week, along with several other residents of South Lansing, and thought there would be dedicated time to make comments specific to South Lansing. It was a great meeting but no such time was given. With that said, the text below is the statement I was prepared to issue. Please read, consider, and make part of your official records.

Appreciate all that you do!

Adam Hussain

"My name is Adam Hussain and I am here to represent Rejuvenating South Lansing and its more than 300 members. I served on the Lansing Park Board for 5 years, that last two of which I served as the vice president, and worked on two successful millage proposals, I have a great deal of respect for the work that you have done in getting this millage passed and the tremendous amount of work you have done, and will do, to create and execute a plan that appropriates money in the most responsible and effective manner. Parks and trails mean a lot to me because I understand the promise that they hold for our community. The job you have in front of you is an important one and I am confident that this is the right group to tackle the challenge.

In South Lansing, we are working diligently to improve the image of our neighborhoods, retain and attract residents, market our corridors and commercial districts, and truly rejuvenate this part of the region. South Lansing is important to the entire region, and as South Lansing gets stronger, the entire region will get stronger. We are talking about creating better transitions to adjacent communities and creating synergy that will benefit the entire area. Specifically, when discussing the attraction and retention of residents, we know that when homeowners and potential buyers discuss community amenities that are important to them when choosing a place to live, quality "paths", whether that be biking, jogging, walking trails or sidewalks, comes in second only to highways access. More and more, businesses are also stating that the walkability and bikeability of a community, and the connectivity and transportation infrastructure in place, has a huge impact on whether they invest in a community. Lansing has shown a commitment to paths, as evidenced by our 2009 Complete Streets Ordinance, the first of its kind in Michigan, and the non-motorized plan that we have in place as a result of that ordinance. Further, Lansing voters showed up in droves to support this millage. I think what you will find with Lansing residents and leaders is a team of individuals that are ready to assist you in any way possible as you go forward with this process.

In South Lansing, some of the amenities and tools we are hoping that this millage will provide us with are:

1. Safety tools on the trails (lighting, emergency pulls, street signage for 911 reference)
2. Maintenance and upkeep of trails and surrounding areas (from trash pickup to crack sealing)
3. Bike stations and racks
4. Benches and areas for families to have picnics
5. Connectivity: trails that interact with, and connect to, businesses, nature centers, commercial districts, parks, etc.
6. New trail construction - there are several areas in South Lansing that would benefit from additional trails and the connection of existing trails
7. Walking clubs for seniors
8. Amenities that provide learning experiences for kids and adults alike while riding or walking down the paths (e.g. signage that informs about ecosystems along trails)
9. Trail maps with information about the area

Again, we appreciate everything you do for our community and we appreciate the opportunity to address you with our hopes for the millage. Please continue to let us know how we can support you as we want to do everything we can to make sure that this millage is remembered as one of the most successful to ever be passed and executed.

Thanks again,

Adam Hussain
